6.8

Hardness

90

☒ Yes ☐ No

Type of Service

☐ Survey

☒ Treatment

☐ Fountain Service

☐ WQ Sample Service

☐ Other Service

Species Treated

Filamentous

Comments

Surveyed the lake:

Observed no significant growth of targeted rooted aquatic vegetation or algae present at this time. Observed a minor growth of algae in the Blue road cove and along spot specific areas of the shoreline. Applied algaecides for the further control of the targeted algae populations. Past treatments for the nuisance rooted aquatic vegetation and algae has controlled the targeted populations.

LMS will return for further management:

Overall Condition: Very Good

Met and spoke with George and Mike Rowe concerning management.

Aquatic Algae Present

Filamentous

Aquatic Plants Present
